

CHEMICAL PRICING MODULE WITH MEDI-SPAN

PK Software's Chemical Pricing Module ensures you have the most current pricing information for compounding ingredients and commercially available products within The Compounder™ pharmacy software. This module creates efficiencies in pharmacy workflow by displaying Medi-Span drug information and allows commercially available brand and generic drugs, as well as compounding ingredients to be entered directly into the chemical system.

Module Features

1. Ability to obtain latest chemical pricing when making a log
2. Download Medi-Span drugs to The Compounder
3. Download Medi-Span chemicals to The Compounder
4. Pricing information for brands/generics
5. Pricing information for commercially available chemicals*

** Includes other wholesaler chemicals*
